THE KUBOTA GRO

Kubota mowers boast exceptional performance, reliability, and efficiency

Renowned for their durable construction, Kubota mowers are engineered to handle a variety of terrain and ease of use and boasts advanced features like ergonomic controls and fuel-efficient engines. With outstanding results while minimising maintenance and downtime. **Explore the range below, or call**

MOWERS

FC Series

Power: 22-50HP
Weight: 1000-2000kg
Cutting width: 44-61"
Collector capacity: 600/800/1300l

G Series

Power: 22-25HP
Weight: 815-995kg
Cutting width: 48-54"
Collector capacity: 560/640l

GR Series

Power: 13-21HP
Weight: 355-545kg
Cutting width: 42-48"
Collector capacity: 340/450l

UTILITY VEHICLES

RTV-X1110 RTV-X1140

Power: 24HP
Weight: 1000-1090kg
Body colours: Kubota Orange/
Realtree AP Camo

GROUND CARE RANGE

...y, making them a top choice for both residential and commercial users.

...ns and conditions, ensuring a consistently high-quality cut, and each model is designed for comfort

HILLTIP SPREADERS

Hilltip are fast becoming the spreader of choice for the UK's Winter Service Industry. Their innovative equipment for UTVs, pickups and tractors help contractors and councils lower running costs, improve winter resilience and service delivery.

Made in Finland, Hilltip know how to deal with the worst of winter conditions. They operate from an app on your phone, keep a record of salt spread, and are simple to set up.

Hilltip Icestriker

We are the dealer for Lincolnshire and have a demonstrator machine available so please get in contact if you would like to try our demonstrator on your site.

Kubota and UV Boosting partner to drive sustainable agriculture

In June, Kubota Corporation and UV Boosting announced a partnership to pilot and promote innovations jointly. UV Boosting is a French start-up that offers a unique patented solution for stimulating the plant's natural defences through UV-C flashes.

The first aim was to work on sustainable solutions for the viticulture industry, which is facing global issues such as environmental regulations and climate-change impacts. A further plan is to expand the pilot to other crops in orchards.

UV Boosting was founded in 2017 and its technology is already present in the European market. The high-energy UV-C flashes trigger a defence mechanism in plants, enhancing its natural defences. This allows growers to reduce their reliance on fungicides and minimise damage caused by pathogens & other abiotic stresses like spring frost or drought. This UV-C flash technology is crop agnostic, and the existing implement portfolio can be easily extended into other crops.

Kubota plans to tackle global challenges, such as environmental regulations, climate impacts, and labour shortages, by expanding community-focused operations and offering integrated solutions and technological advancements for customers.

"Increasing regulatory restrictions and environmental concerns are enabling a need for alternatives to minimise chemical inputs in specialty crops," – says Daria Batukhtina, Strategic Business Development Manager at Kubota Innovation Centre Europe. *"This pilot programme with several clients & dealers is a part of Kubota's strategy to create an eco-system which allows innovation to evolve through partnerships with external businesses such as AgTech start-ups, agricultural producers, research institutes and universities."*

Customer feedback is crucial for refining Kubota's products and services, ensuring they meet market needs effectively. By actively involving distribution partners in the innovation process, the organisation could swiftly integrate valuable insights and deliver enhanced solutions that drive customer satisfaction and market success.

For the pilot programme two countries were targeted, Italy (Brescia area) and France (Anjou). The participating dealers will manage and support UV Boosting technology during the pilot period locally and collect customer feedback. The distribution network already recognises an increasing demand for new environmentally friendly solutions that enables plant self-protection through UV light stimulation.

"With this partnership, Kubota is extending its scope into alternative crop protection solutions and accelerating its innovation strategy with the objective of creating new business opportunities." – says Herve Gerard-Biard, VP Business Development, Kubota Holding Europe BV.

Kubota's clients will apply 4-7 treatments during the season to evaluate its technology, impact on the yield results as well as the overall effectiveness on the trees' health state. According to experts and backed by scientific evidence, UV light solutions secure the yield for organic, biodynamic or conventional wine growers.

**BIGGER
STRONGER
TOUGHER**

The **EDGE Trailers** are Stewart's range of small dropside trailers, ideally suited for use in groundcare applications, offering the durability and functionality needed to handle the demands of landscaping, turf maintenance, and other tasks. Designed to withstand rough terrain and carry heavy loads, it ensures efficiency and reliability in various groundcare settings.

EDGE 4: 3000x1950x500mm
EDGE 8: 4000x2300x500mm
EDGE 12: 5000x2420x600mm

The trailers have a multi-function back door including spreader chain points and are built to withstand tough conditions, and are built with a Hardox body, which is tougher than mild steel. The EDGE trailers have an integral body prop so maintenance can be carried out safely, as well as back doors which hinge from the top or can be opened to the side thanks to a clever system of catches. Spreader chain points allow the door to be secured partially open for spreading loose material.

WHAT IS HARDOX®?

Hardox® is a wear plate; structures made of Hardox® weigh less and last longer than those made from mild steel. A tipper body made from Hardox® is more durable due to the unique combination of hardness and toughness. Using Hardox® allows for a body design with a minimum number of reinforcing beams on the outside.

AVAILABLE FOR LONG OR SHORT TERM HIRE

- JCB 4220 ICON FASTRACS
- JOHN DEERE & KUBOTA TRACTORS 120hp-250hp
